JUL 1983

CHARTER OF THE ARTIFICIAL INTELLIGENCE
APPLICATIONS WORKING GROUP
OF THE CIA INFORMATION SYSTEMS BOARD

- Coordinate the Agency's research and development efforts with the growing interest in many components for trying AI solutions on specific intelligence problems.
- Determine the future mechanism for managing Artificial Intelligence at CIA -- possibly an AI center for monitoring research and development and another center for applying the fruits of R&D to specific users and problems.
- Suggest future Agency programs and projects in AI research and development (without becoming a major funder in this very expensive arena), AI applications, training, etc.
- Monitor AI developments of interest to the Agency within the Intelligence Community and among contractors, research institutions and universities.
